Did anyone get on the AWA Linc Cundal Memorial OT Contest on =  
Wednesday/Thursday? I listened and called on and off for several hours =  
on 80, 40 and 20, and I only heard three other guys - worked two of =  
them. Maybe it will be better on Saturday/Sunday.

Jim, W8KGI

I have a SB-220 that has been converted to 6 meters and I improved the change somewhat as I was not satisfied with the 1964 CQ circuit used for the modification. The only hold over from this modification is a strap from the band switch to the appropriate tap on the tank coil. The strap was soldered in the center (the end of the Heath supplied 10 meter connection) and has come undone. I plan on using silver solder and a small torch (the set up I use to resolder the filament pins of 3-400/3-500 Eimacs). I need to find a clip of some kind to make a good connection between the two pieces of strap even before soldering. Any ideas??

Dave K4JRB

Clean & tin the ends, overlap by 1/2 inch or so, and use needle nose pliers on the very edge of the overlap - twist the pliers by about 90 degrees or so. Once on each side, and you will mechanically join the 2 pieces just fine. There are a lot of other ways of doing this - can use a small punch

and drive several holes completely through both pieces.

Good luck,

Don AD6PB

Hi Gang,

I'm looking for a good high resolution photo of your BC-610, and hopefully the BC-610 located within your station, for use in my QST column. Photo should be well lit, in focus, high resolution (at least 400k - better is 700+k) and in .jpg file format. If you can, turn on the rig so the panel lights are on. You in the photo is OK too.

I need the photo this weekend. The photo I have, and was planning to use, is not real clear. I'm hoping to get a better one.

Any questions, email or telephone me 609-927-3873.

Email address is oldradio@worldnet.att.net

Thanks & 73, John Dilks, K2TQN

Hi Gang,

Al Klase, N3FRQ, is going to go over to Joe's - N3IBX - house, tomorrow and take some hi-res photos for me, of Joe's 610.

The one I was going to use for my article was my old one from 30+ years ago when I was in the AF. The photo has deteriorated and is now not suitable. I had a 610-I I got while I was in the AF. It was fun back then. I gave it away when I needed to spend time building my (then) new home for 2-years. .... I've been sorry ever since.

Thanks & 73, John, K2TQN
